Weight (lbs)	75	250
Weight (lbs) Shipping-Palletized	78	290

System Overview and Benefits

- All models automatically count and audit all cash inserted in a **reliable fast MEI Bill Acceptor**. USA Currency and International Note options. Bills are stored in a lockable cassette that can't be accessed by the operator **providing security for store personnel and the cash**. For some applications a bulk note feeder option is available. The CashTrak™ 310 comes with 1 bill acceptor. For busy locations the CashTrak™ 320 has **dual bill acceptors to enhance speed and provide backup while providing increased**

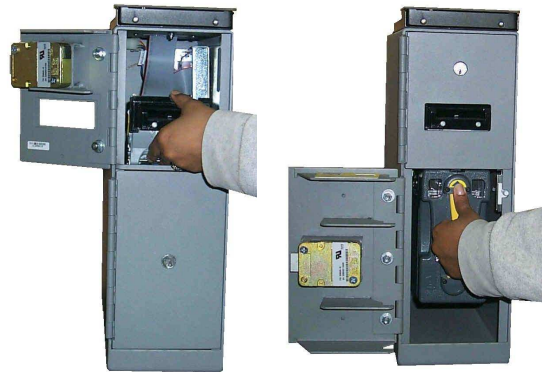

security. A Bunch Note Feeder is also available as a faster way to deposit and secure cash.

- The ability to function as a stand alone safe or integrate with POS hardware or back room software allows **flexibility** for current and future needs. An Ethernet interface or a wireless GSM Cellular communication option can be selected. The cellular option eliminates cabling and is available for the CashTrak™ 310 or 320. Flexibility of design also offers integration into Kiosks.

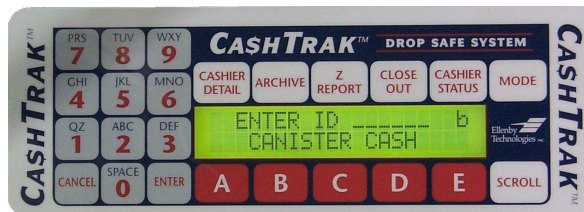

System Overview and Benefits

- CashTrak™ patented 2 door design is standard with all models and **provides service without access to money**. Any rare occurrence of a bill jam can be cleared by local store personnel without accessing cash in the locked cassette. This eliminates the need for a costly field service visit.

- An **intuitive durable easy to use** keyboard is provided with all models and a thermal printer for reports is an available option.

Stand Alone or POS Integrated Safes

- The capability to update new bills or software on-site with closed safe doors is standard with all models. **Remote updating** capability is also a feature with the entire CashTrak™ family (requires Ethernet or CSM option).
- If required a riser base option is available on CashTrak™ 310 to increase height of safe. The riser base for the CashTrak™ 320 includes a **drop box slot** for envelopes along with lock for security.

- Side Safe can be **Intelligently interfaced** with Ellenby CashTrak™ 310 or 320 or used as a stand alone Safe.

- Rolled coins can be stored in the Side Safe with secure access control.
